

Here is the complete, unified blueprint containing all **8 Strategic Goals** for the think tank.

Strategic Manifesto: Vision 2600

A 15-Year Blueprint for the Revival and Prosperity of Iranian Arts and Culture

Operating Status: Active (Offshore / In Exile)

Core Directive: To act as an un-censorable digital repository, legal incubator, and economic architect for the future of Iranian culture—absorbing all risk from the diaspora while protecting and gathering data from creators on the ground.

1. Cultural Truth, Reconciliation & Identity Revival

Objective: Recover, document, and restore the authentic Iranian national identity and regional heritages that have been deliberately suppressed, rewritten, or criminalized by the regime.

- **Immediate Website Action:** Launch a crowd-sourced, secure digital archive called the *Index of Erased Heritage*. Invite citizens and historians to anonymously submit pre-Islamic history, banned literature, forbidden music, and suppressed regional traditions.
- **Post-Regime Policy Goal:** Establish a rapid-restoration framework for archaeological sites, mandate the de-politicization of history in school textbooks, and officially revitalize the diverse ethnic heritages of Iran.

2. Institutionalizing Freedom of Expression & Anti-Censorship Law

Objective: Erect ironclad constitutional and legal barriers ensuring that creative expression can never again be weaponized or policed by any governing authority.

- **Immediate Website Action:** Host collaborative digital "Legal Hackathons" connecting exiled Iranian human rights lawyers with creators inside the country to draft the future *Charter of Artistic Freedoms*.
- **Post-Regime Policy Goal:** Draft the immediate legislative repeal of the Ministry of Culture and Islamic Guidance (*Ershad*). Replace it with strict legal protections that decriminalize satire, social critique, and alternative lifestyles in art.

3. Designing Independent, "Arms-Length" Cultural Governance

Objective: Insulate cultural funding, management, and institutional leadership entirely from political regimes, moving to a peer-reviewed, expert-led

governance model.

- **Immediate Website Action:** Publish research papers and interactive blueprints detailing successful international autonomous models (e.g., the *Arts Council* model used in the UK and Canada) to educate the public on non-state governance.
- **Post-Regime Policy Goal:** Form concrete legislative plans to build the **Independent Iranian Arts Endowment**—a public funding body managed strictly by artists, curators, and cultural experts, completely shielded from political interference.

4. Elevating the Socio-Economic Status of Creative Workers

Objective: Guarantee the financial security, physical dignity, and professional labor rights of independent Iranian artists, turning art from a hazardous gamble into a viable career.

- **Immediate Website Action:** Run encrypted, metadata-stripped micro-surveys targeting artists inside Iran to map their current economic struggles, housing conditions, and health needs.
- **Post-Regime Policy Goal:** Formulate the legal framework for a national **Artist's Guild and Universal Safety Net**, offering mandatory freelancer healthcare, emergency grants for political trauma recovery, and international-standard copyright protections.

5. Activating the Creative Economy & Infrastructure

Objective: Transition culture from a state-subsidized propaganda machine into a highly profitable, self-sustaining economic engine that creates jobs and fuels national GDP.

- **Immediate Website Action:** Operate as a digital bridge and incubator. Connect tech-savvy diaspora investors with underground creators inside Iran to plan future independent streaming networks, design houses, and distribution channels.
- **Post-Regime Policy Goal:** Outline economic incentives such as tax exemptions for private cultural enterprises, the structural commercialization of independent cinema and music, and the repurposing of former regime propaganda centers into public creative hubs.

6. Global Soft Power, Cultural Diplomacy & Vision 2600

Objective: Rebrand Iran on the global stage, replacing the image of a fundamentalist state with the reality of a vibrant, 2,600-year-old civilization leading a modern cultural renaissance over a 15-year roadmap toward prosperity.

- **Immediate Website Action:** Establish partnerships with international museums, film festivals, and academic bodies. Create digital storefronts and online galleries showcasing contemporary

independent Iranian visionaries to a global audience.

- **Post-Regime Policy Goal:** Implement a 15-year diplomatic strategy leveraging international artist exchange visas, the revitalization of historical tourism, and the positioning of Iranian cinema, literature, and digital design as premium global exports.

7. Decentralization & Regional Cultural Sovereignty

Objective: Dismantle the centralized, Tehran-heavy cultural monopoly and empower Iran's diverse provinces to govern, fund, and celebrate their local cultural assets.

- **Immediate Website Action:** Build dedicated regional portals (e.g., Kurdistan, Baluchestan, Khuzestan, Azerbaijan) allowing local creators to safely document languages, music, and crafts that have been marginalized or banned.
- **Post-Regime Policy Goal:** Implement a "Regional Equity Formula" for the national cultural budget. This legally mandates that a high percentage of funds bypass the capital and go directly to local municipalities to build regional theaters, language preservation centers, and ethnic art festivals.

8. Digital Sovereignty, Creative Tech & Cyber-Resilience

Objective: Build a secure, advanced digital infrastructure to protect the creative economy from state surveillance today and corporate monopolies tomorrow, ensuring global financial access for Iranian creators.

- **Immediate Website Action:** Partner with diaspora cyber-security experts and software engineers to establish secure, decentralized distribution channels (via peer-to-peer networks or IPFS) where underground artists can share and monetize their work without regime interference.
- **Post-Regime Policy Goal:** Draft the framework for a **National Creative Tech Infrastructure**. This includes codifying absolute net neutrality, building secure public digital archives, and designing digital payment systems that seamlessly connect future Iranian creators to international banking and global marketplaces.
